TEST PIT LOCATION MAP

Map drawn by:

Make an annotated sketch plan of the test-pits location.

- Show where the test-pit is in relation to features such as houses, boundaries, roads, walls etc. These need to be features that can be found on an Ordnance Survey map.
- Include lines showing the exact distances from the test-pit to permanently identifiable points such as buildings or field corners.
- Draw your test-pit as a square with the corners numbered 1-4, to correlate with the numbers on each Layer plan.
- Draw an arrow showing the direction of North on your map.
- **REMEMBER:** Your plan needs to be understandable to someone who doesn't know the site.
